🚀 Start a Topic

- Watch video
- Code in VSCode or Jupyter
- Try your own small changes

📁 After Practice

- Make a folder (e.g., loops, pandas)
- Save .py or .ipynb files
- Write 1-line note: “Today I learned [topic]”

💾 End of Day

- Push to GitHub:
  git add . → git commit -m "Learned [topic]" → git push

📢 After Big Topic

- Post on LinkedIn: what you learned, image/code, GitHub link
- Update GitHub README

❓ If Confused

Ask ChatGPT:

“Hey, I’m watching a Python tutorial, but there’s a part on [enter your topic] that I don’t understand. Can you explain it to me like I’m a beginner? Maybe show me a fun example or game-like way to learn it?”

"Hey, I’m learning Python and I need some practice with [enter your topic]. Can you give me a few simple exercises or problems to solve so I can get better at it?"

- Save good answers in notes

🧪 After 2–3 Topics

- Make a mini project
- Push to GitHub /projects folder
- Write a simple README

🏁 After Finishing Python+Numpy+Pandas

- Make a big project
- Create portfolio folder
- Share on LinkedIn with GitHub link and image

🔧 When Improving Old Code

- Clean code or add comments
- Push with message: improved [topic]

🎯 When Ready

- Start solving beginner problems on Kaggle / LeetCode
- Push to GitHub in Problem Solving repo
